

E-Invoicing Readiness Lab

In the E-Invoicing Readiness Lab, we work with you to develop a roadmap for the practical implementation of the legal requirements in your company.

We analyze your process flows, IT infrastructure and data quality.

Challenge

The digitization of outgoing and incoming invoices is increasingly being driven by tax legislation (e.g. ViDA, e-invoicing) in many countries. Your company must respond to this across all departments.

In addition to ensuring compliance, there are also opportunities to increase efficiency and reduce costs. We will explore these with you in our Lab.

Solution

Having an E-Invoicing Readiness Lab with us will enable you to gain a clear understanding of the regulatory requirements and identify opportunities and requirements for change specific to your organization.

The aim of the Lab is to identify your specific need for action and get you started.

Our Service

Our Lab, in the form of a full-day workshop, takes a holistic approach to the topics:

- Legal basis
- E-invoicing in an international context
- Impact analysis
- Processes and IT
- Responsibilities within the company
- Data quality as a prerequisite for e-invoicing
- Compliance requirements in the company
- Overview of technical solutions available on the market
- Joint SWOT analysis for the specific need for action

The outcome of the Lab is a summary report.

Benefits

Release synergies through better cross-departmental understanding and active participation

Increase efficiency and effectiveness in meeting compliance requirements

Use e-invoicing as an opportunity to further digitize processes

Identification of company-specific action needs
